

PRINT THE CURASEPT CHRISTMAS CARDS TO ADD A SPECIAL TOUCH TO YOUR GIFTS!

RECOMMENDED MATERIALS:

Paper: you can use standard printer paper, but for the best results we recommend a **120 g/m² white cardstock**.

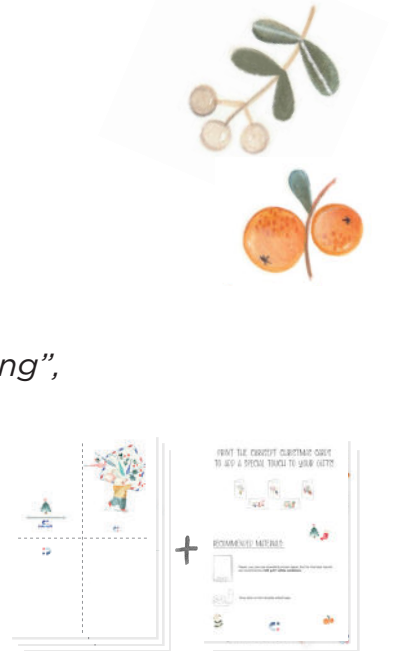

Glue stick or thin double-sided tape.

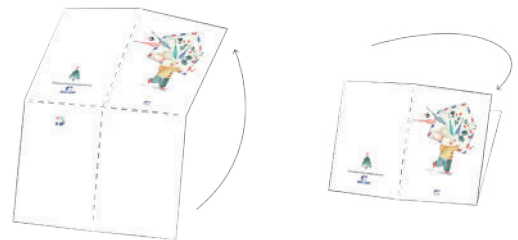

PRINTING:

1. **Download the PDF.**
2. **Print it** by selecting **A4** paper size and *"Single-sided printing"*, choosing the *"Actual size"* option if available.
3. **You will get 7 pages**
(5 gift cards + 2 instruction sheets).

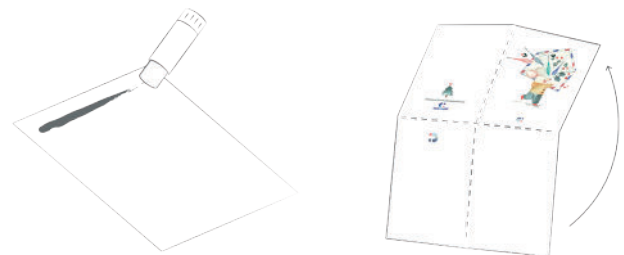

CARD PREPARATION:

1. **Fold the sheet** in half **along the dotted lines**, then open it again.

2. **Apply glue** to one half of the back and **fold the two sides together** so they align perfectly (if using double-sided tape, we recommend placing it along the edges as well).

3. **Fold the sheet in half again** to create a four-page card, like a small booklet. Press along the fold to ensure a clean, neat finish.

4. **Write your message** inside the card.
